To [#smallbusinessowners](#) and [#entrepreneurs](#): You're invited to [@TEDCO](#)'s FREE Inaugural Tech Fair on September 12, 2022, at the Hotel at the University of Maryland | Register today: www.techfair.tedcomd.com

TEDCO created the fair to connect entrepreneurs and small business owners in any industry from Maryland's underserved communities to technology companies, resources, on site trainings, and networking opportunities to grow their business. U.S. Senate Committee on Small Business & Entrepreneurship Chair Ben Cardin worked closely with TEDCO to create this fair and will deliver a keynote address.

Small businesses looking to broaden their footprint and increase future sales can interact with larger, established tech companies to learn about trainings, online platforms for sales, advertising techniques, and more. Women and diverse startup founders and business owners who traditionally have been underserved by the entrepreneurial ecosystem are encouraged to attend and share news of the free fair with their networks.
